

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript, C, Java
- **AI & Machine Learning:** LLM Application Development, Sentence-Transformers, Faster-Whisper
- **Backend Development:** FastAPI, REST API Development, API Integration (Google Gemini API)
- **Frontend Development:** React, TailwindCSS, Vite,
- **Databases & Backend Services:** Supabase (PostgreSQL), MySQL, MongoDB

PROJECTS

- **AI Interview Assistant**
Developed an AI-powered interview preparation platform that records candidate responses, performs speech-to-text transcription, and generates real-time feedback using LLM-based analysis. Implemented a 6-metric scoring system evaluating content, delivery, communication, voice, confidence, and structure with personalized coaching via Google Gemini.
Technologies: Python, FastAPI, Faster-Whisper, Sentence-Transformers, Google Gemini API, React, TypeScript, TailwindCSS, Supabase
- **Sentinel: Zero-Knowledge Password Manager**
Developed a privacy-first password manager with client-side AES-256 encryption enabling secure vault storage without exposing plaintext data to the server. Implemented password hygiene analysis, breach detection using the Have I Been Pwned API, and a security dashboard with personalized improvement recommendations.
Technologies: React, Vite, TailwindCSS, Supabase, CryptoJS, zxcvbn
- **Laravel Gallery (CloneFest Competition)**
Developed and enhanced an image gallery application during the CloneFest competition, implementing features for image upload, organization, and media management using the Laravel framework.
Technologies: Laravel, PHP, Blade Templates
- **Chyrp Blog Platform Enhancement (CloneFest Competition)**
Extended the Chyrp CMS blogging platform during the CloneFest competition by customizing themes, improving the UI, and implementing core content management functionality.
Technologies: PHP, HTML, CSS
- **Smart Rain Shed Controller (IoT Model)**
Built an IoT-based automated rain shed controller that detects rainfall and automatically closes or opens a protective shed using sensor inputs and microcontroller logic. Designed as a working hardware prototype for automated environmental response.
Technologies: ESP32, Arduino, Rain Sensor, Embedded Systems

POSITIONS OF RESPONSIBILITY

Organizer, Rotaract Club of RVCE	November 2025 – Present
Associate Member, Coding Club RVCE	December 2025 – Present
Associate Member, QuizCorp	December 2024 – Present

EDUCATION

• R. V. College of Engineering (RVCE), Bengaluru <i>B.Tech in Information Science; CGPA: 9.80</i>	Bengaluru, Karnataka <i>September 2024 – July 2028 (Expected)</i>
• KMWA Pu College (Deeksha Vedantu), Bangalore <i>Science (PCMC); Result: 97.16%</i>	Bengaluru, Karnataka <i>2022 – 2024</i>
• S.G International Public School (SGIPS), Bengaluru <i>CBSE; Result: 95.8%</i>	Bengaluru, Karnataka <i>2012 – 2022</i>
